

Air Receivers

Volumes 90 – 10,000l

Air receivers

KAESER: Your one-stop shop

In fulfilling their storage and buffer functions, air receivers play a key role within a compressed air station: they provide capacity during periods of peak demand and are often used to separate condensate from the compressed air. It is therefore important for receivers to be correctly sized for the specific system and to be resistant against corrosion; inspection intervals should also be as long as possible. Needless to say, air receivers from KAESER KOMPRESSOREN meet all of these requirements and more.

Comprehensive selection

Whether 90 or 10,000 litres, 11, 16, 45 or 50 bar, all KAESER compressed air receivers are designed and manufactured to the highest quality standards to ensure exceptional safety and durability. You only get genuine KAESER quality with genuine KAESER air receivers. Moreover, they benefit from exceptional corrosion prevention and clever transport protection measures.

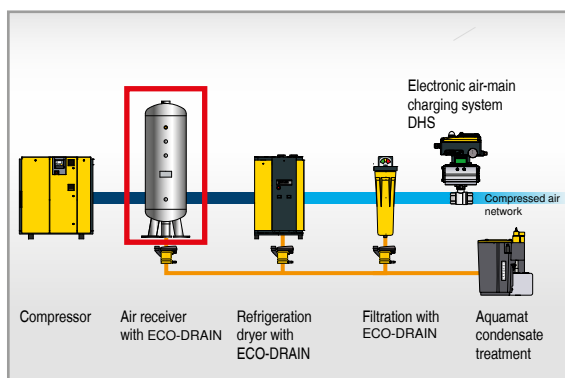

Inspection intervals up to five years

Meticulous design, including thicker walls in accordance with AD 2000 regulations, enables long inspection cycles of up to five years. This not only reduces service and maintenance costs, but also increases compressed air efficiency and availability.

Perfectly matched accessories

KAESER accessory sets are especially tailored to meet the exact needs of the specific application. Ensuring maximum convenience, they include quality components such as ball valves, pressure relief valves, pressure gauges, drain taps, gaskets, fittings and associated smaller components. For added peace of mind regarding compliance with wastewater and environmental regulations, electronic controlled condensate drains are available as complete sets, including connection components that are matched to the specific air receiver.

Installation upstream from compressed air treatment

Installation downstream from compressed air treatment

**No leaks,
no worries!**

Vertical air receiver, hot-dip galvanised

Air receivers

Dependable, durable, reliable

Inspection intervals up to five years

Meticulous design in accordance with AD 2000 regulations enables five-year inspection cycles. This not only reduces service and maintenance costs, but also increases compressed air efficiency and availability.

Optimal corrosion resistance

All KAESER air receivers are hot-dip galvanised both internally and externally in accordance with DIN EN ISO 1461, which means they last approximately three times longer than conventional models.

Excellent maintenance access

Cleaning, maintenance and receiver inspection tasks are made simple thanks to generously sized access openings. Efficiency is further enhanced as a result.

ECO-DRAIN complete sets

Electronically controlled condensate drains ensure exceptional performance. Available as a complete set, includes attachments matched to air receiver.

Complete connection sets

Made-to-fit connection sets comprising:

ball valve, pressure relief valve, pressure gauge, drain tap, gaskets and associated smaller components.

Shut-off valve

Test flange

Pressure gauge

Pressure relief valve

The world is our home

As one of the world's largest manufacturers of compressors, blowers and compressed air systems, KAESER KOMPRESSOREN is represented throughout the world by a comprehensive network of branches, subsidiaries and authorised distribution partners in over 140 countries.

By offering innovative, efficient and reliable products and services, KAESER KOMPRESSOREN's experienced consultants and engineers work in close partnership with customers to enhance their competitive edge and to develop progressive system concepts that continuously push the boundaries of performance and technology. Moreover, decades of knowledge and expertise from this industry-leading systems provider are made available to each and every customer via the KAESER group's advanced global IT network.

These advantages, coupled with KAESER's worldwide service organisation, ensure that every product operates at peak performance at all times, whilst providing maximum availability.
