

1. Personal

Name: André Tandberg, based in Moss, Norway.

Role: Co-founder and CEO of Aurelian Manufacturing. My first task is to structure the company's financing and investor relations, ensuring the foundation for long-term growth. I focus on governance, capital strategy, and building the partnerships needed to scale, while supporting my co-founder in developing an investable business case.

Together with my co-founder, I support the development of an investable business case, while maintaining focus on capital strategy, stakeholder relations, and positioning Aurelian as a trusted industrial partner.

Background: Experience as CEO of a pre-seed investment fund supporting early-stage technology companies, and leadership of organizations of up to 70 employees in the retail sector. Board member of a listed regional bank. Master's in Innovation and Entrepreneurship (NMBU) and Bachelor's in Creativity, Innovation, and Business Development.

Company: Aurelian Manufacturing – building one of the most automated industrial production facilities in Norway.

AI Usage: AI-first mindset. AI-first mindset, using AI to optimize company processes and as a personal assistant in planning and execution.

Strengths: Strategically creative and action-oriented, with broad business and financial insight. I can connect people, develop talent, and use interpersonal insight to drive results.

Weaknesses: Broad experience sometimes comes at the expense of deep specialization, and I can be impatient when progress is slow. I also take on many roles, which may risk spreading myself thin.
